Professional Summary

Frontend Engineer experienced in building responsive, production-ready web applications using React, TypeScript, and modern frontend technologies. Skilled in application architecture, state management, REST API integration, authentication workflows, and automated testing. Focused on developing maintainable interfaces, predictable application behavior, and reliable user experiences.

Engineering Experience

Causolve - Incident Investigation & Response Platform

- Built a responsive, installable React and TypeScript Progressive Web App (PWA) for an incident investigation platform, implementing authentication, organization onboarding, and engineering workspace interfaces using reusable components and structured application state.
- Integrated 3 authentication methods (email/password, Google OAuth, and GitHub OAuth), implementing session restoration, protected routing, email verification, and password recovery.
- Collaborated with a backend engineer to integrate custom REST APIs using shared Zod contracts, implementing a 3-step organization onboarding flow, workspace creation, session management, and API error handling.
- Developed 29 Playwright end-to-end tests covering authentication and onboarding workflows, with all tests passing on Chromium.

GitHub

Vydra - Financial Intelligence Platform

- Built and deployed a responsive financial management application using React, featuring interactive dashboards, transaction tracking, budgeting, financial insights, and data visualization.
- Developed a production marketing experience achieving 100/100 Lighthouse accessibility scores on both mobile and desktop, alongside 96/100 Best Practices and 92/100 SEO scores.
- Achieved a 92/100 desktop Lighthouse performance score with 0 cumulative layout shift (CLS), demonstrating stable rendering and consistent layout behavior under tested conditions.

- Developed a financial insights workflow combining deterministic financial analysis with AI-generated explanations, supported by validation and fallback mechanisms.
- Implemented guided onboarding, exportable financial reports, and persistent application state to support consistent user experiences across sessions.

Live Web | GitHub

SkillForge - Real-Time Skill Exchange Platform

- Built a responsive skill exchange platform featuring real-time messaging, user authentication, and structured skill-request workflows.
- Implemented predictable request state transitions and real-time messaging with delivery and read receipts, while preventing duplicate conversations.
- Secured user data using Firebase Authentication and Firestore security rules, enforcing account-level data isolation.
- Introduced unit and end-to-end testing for critical application workflows using Jest and Playwright.

Technical Skills

Frontend: React | TypeScript | JavaScript (ES6+) | HTML5 | CSS3 | Tailwind CSS | Shadcn/ui | Framer Motion

State Management & APIs: Zustand | TanStack Query | Context API | Axios | REST APIs | Zod

Testing & Quality: Playwright | Vitest | Jest | React Testing Library | MSW | ESLint | Chrome DevTools

Tools & Platforms: Git | GitHub | GitHub Actions | Vite | Firebase | Vercel | Express.js

Education

- **Bachelor of Arts, History and International Studies**

  Ekiti State University, Nigeria - 2024
